

PEOBriCS Transport Solution

PEOBriCS Transport and Fleet Tracking Solution is a Total Software Solution for businesses engaged in the Transport and Fleet Operation Businesses.

With PEOBriCS Transport Solution, Businesses can Manage Order Booking including Passenger Ticket Sales, Transport/Freight Orders, and Vehicle Chartering, Plan and Schedule Journeys, Assign and Manage their Employees, Track their Vehicles throughout their Journeys as well as provide a Customer Portal allowing Customers Online Reservation and Booking Facilities with the Option of Tracking Vehicles they are booked on.

The Vehicle Control Center provides a Central Control Center for all Vehicle Activities including Vehicle Tracking and Monitoring for Speed and Fuel Levels, Breakdown Management Activities such as Service Vehicle Dispatch and Journey Rescheduling as well as Vehicle Maintenance Activities such as Scheduling Preventive Maintenance along with Organizing Unscheduled Maintenance Activities as and when required.

Benefits:

- Book all sorts of Transport Orders including Passenger Tickets, Freight/Transport Orders, and Vehicle Chartering against Availability
- Plan out Journey Timetables and Allocate Employees and Vehicles to Schedule
- Manage Vehicle Inspection on Departure and Arrival and Identify Maintenance Requirements
- Track Present Locations of all Vehicles and Maintain Vehicle Locations History
- Receive Alerts of Journey Exceptions including Breakdowns, Speeding, Unscheduled Stops and Route Deviations
- Manage Journey Exceptions Centrally and Perform Tasks such as Journey Rescheduling and Service Vehicle Dispatch
- Analyze Journeys for Driver-wise and Vehicle-wise Performance and Profitability
- Keep track of Vehicle Service History and Manage both Preventive and Unscheduled Maintenance
- Maintain Stock of Spare Parts along with Usage History and Repurchase Level Alerts
- Manage Employees Attendance and Timesheets with RFID Cards
- Single Point Vehicle Control Center
